Rishit Gupta	2022406
Ritesh Kumar Parihar	2022407
Ritika Thakur	2022408
Ritviek Padda	2022409
Riya Gupta	2022410

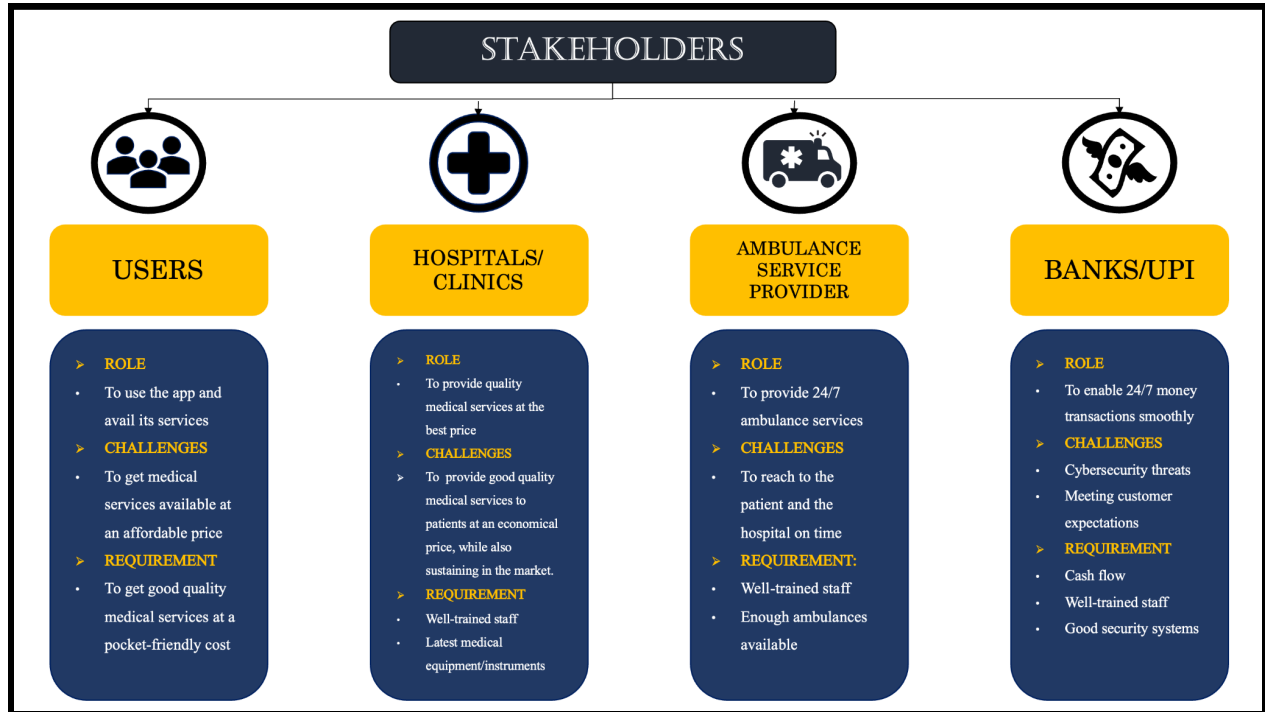

Project Group Number: 2

HCI Group No.: 6

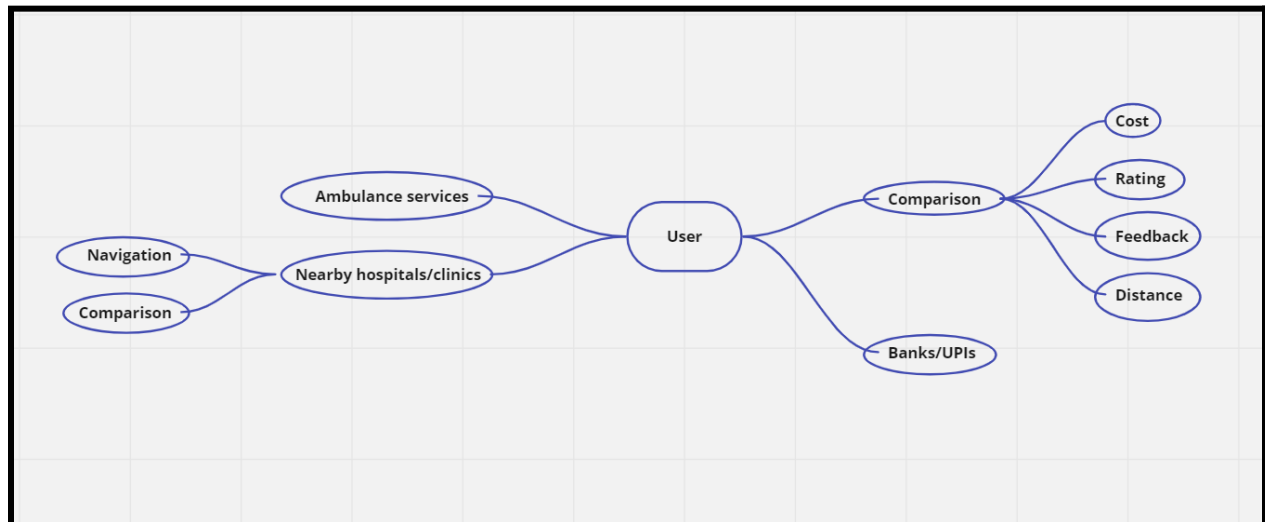

Requirement Gathering

<Identifying stakeholders and their roles, challenges, requirements and expectations of users through tools like interviews, mindmaps, use-case diagrams etc.>

A. We identified four stakeholders involved in our project: Users, Hospitals and clinics, Ambulance service providers and Banks/UPI. Based on research and interviews, the following are their roles, challenges and requirements:

We also tried to depict the services that our app tries to tie the users to through the mind-map given below:

https://miro.com/app/board/uXjVP3csgHM=

Personas and Scenarios

<developing different user archetypes to understand and empathise with users through business and personal contexts>

A. We created personas based on our interviewees and their unique experiences to better understand our user base and their requirements.

PERSONA 1

[Behavioral Persona, Online Whiteboard for Visual Collaboration \(miro.com\)](https://miro.com)

The first persona has been created about a 29-year-old pregnant lady, Madhavi Goyal. Based on an interviewee, we highlighted her goals, needs and frustrations in order to understand better how to design an app to cater to her needs.

PERSONA 2

https://miro.com/app/board/uXjVP3e8Ap0=

The second persona talks about Mr Harsha Pandey, a 68-year-old citizen residing in Delhi. Being a senior citizen, we covered his goals, needs and frustrations in order to understand better how to design an app that can help him in attending to his medical needs.

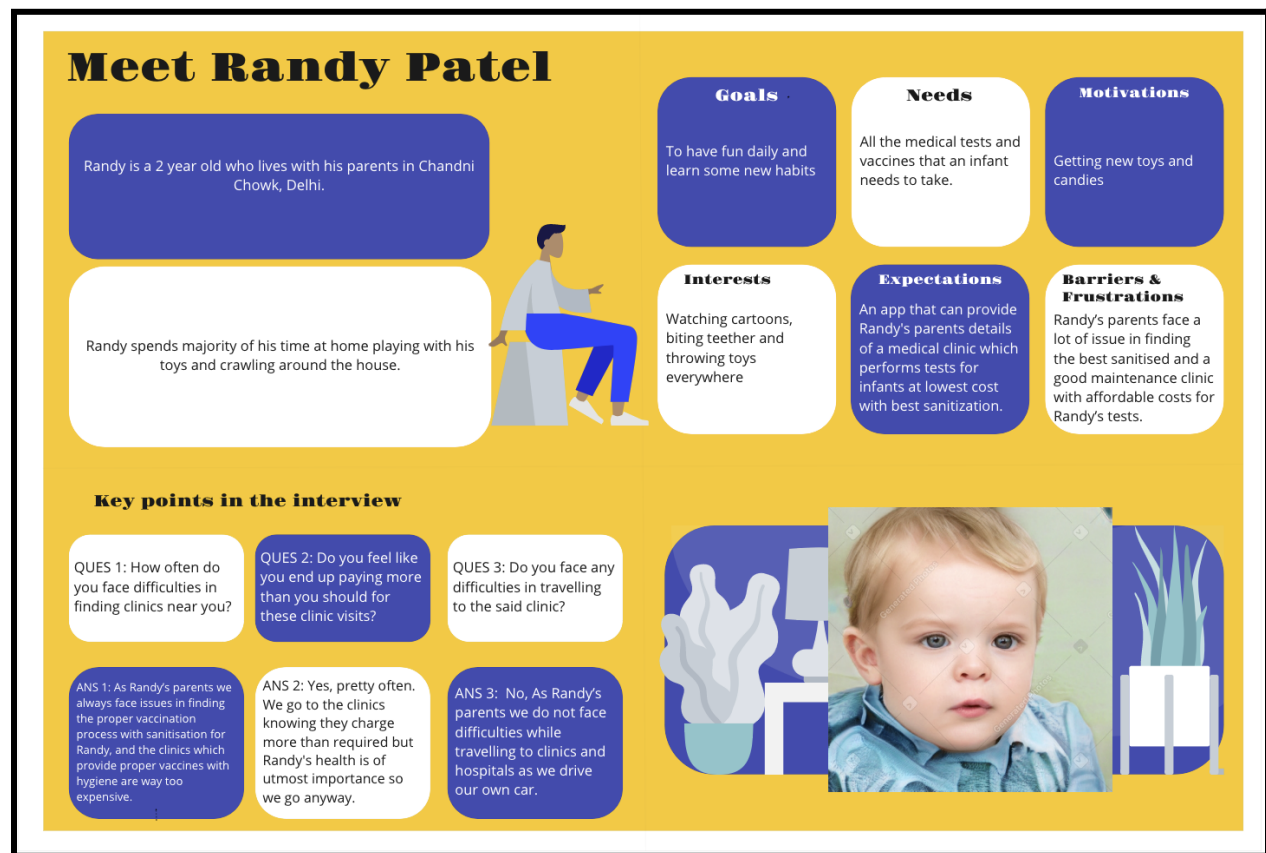

PERSONA 3

https://miro.com/app/board/uXjVP3eRePI=

The third persona is about Mr Arun Kumar, a cancer patient. Based on an interviewee, we highlighted his goals, needs and frustrations in order to understand better how to design an app to cater to his needs and help him through these difficult times.

PERSONA 4

https://miro.com/app/board/uXjVP3cA_Ss=

The last persona talks about a 2-year-old infant, Randy and covers him and his parents' goals, needs and frustrations.

Problem Understanding

<Elaborate on the proposed solution, its target users, and the specific requirements it would fulfil >

PROBLEM UNDERSTANDING

- Access to quality healthcare in our country is a challenge due to overpopulation, cost and scarcity of medical staff and facilities.
- The first thing that needs to be done is that healthcare facilities must be provided at a minimum distance with ease at an affordable cost so that all sections of society can access the services.
- So, here we are with our app that will help one to compare medical facilities around him in terms of cost and services and hence can get the best medical facility at the lowest possible cost. This would not only save time and money for the users but will give an opportunity to the small clinics which are not well-known to cater themselves to a larger public and earn business.
- Our app would fulfil various requirements:
 1. Help users in getting the best medical services at the lowest cost nearby.
 2. Help users to compare hospitals, medical staff and the quality of services offered by the hospitals/clinics/labs.
 3. Be a profitable model for the local clinics.
 4. Save the time of users by avoiding the hustle to decide which hospital to go to.
 5. Provide ambulance services as early as possible in case of emergencies.

Contributions

<Mention the individual contributions of the group members>

Rishit Gupta	2022406	<i>Problem understanding, Persona: Randy Patel</i>
Ritesh Kumar Parihar	2022407	<i>Persona: Arun Kumar</i>
Ritika Thakur	2022408	<i>Persona: Madhavi Goyal</i>
Ritviek Padda	2022409	<i>Persona: Harsha Pandey</i>
Riya Gupta	2022410	<i>Requirement gathering</i>
